

LA&HA Institute

StarWalker[®] PICO Pro in Aesthetics and Dermatology Workshop

Dedicated to Research & Education on the Medical Power of Light

Location:

LA&HA Institute
Ljubljana, Slovenia

Date:

23 – 24 Feb 2026

Overview

During this intensive workshop, participants will get to know the technological characteristics and advanced capabilities of Fotona's StarWalker® Pico Pro pico-second laser system, as well as learn the principles of using them in a variety of aesthetic procedures ranging from pigmented lesions and tattoo removal to rejuvenation. Participants will learn the basic principles of using lasers in various non-surgical procedures within aesthetic medicine and dermatology. The practical and clinical advantages of lasers and laser-assisted treatments, and the effects of treatment parameter settings and variations thereof, will be explained in detail and discussed by experienced laser practitioners based on actual case materials.

Topics will include:

- Tattoo removal (single color & multiple colors)
- Solar lentigines
- Melasma
- Treatment of Post-Inflammatory Hyperpigmentation
- Skin resurfacing procedures for the treatment of acne scars and wrinkles
- Non-ablative rejuvenation of photo-aged skin using fractional Nd:YAG 1064 nm pico-second laser

Objectives

- Understand laser physics and laser-tissue interactions.
- Understand the effects of different parameter settings and how to identify the ideal settings for specific conditions and applications.
- Learn how to gain the maximum benefit for your practice with Fotona laser systems.
- Learn tips and tricks from laser experts and peers.

All participating principal lecturers are certified Lecturers of the Laser and Health Academy.

The **Laser and Health Academy** is an independent institution developed and founded with Fotona's support to advance medical, technical, and scientific knowledge in lasers and their application in medicine and dentistry. It serves as a platform for exchanging and disseminating scientific knowledge among peers and promoting evidence-based laser medicine and dentistry among practitioners and the public.

The Academy's key activities focus on practical instruction and demonstration of laser techniques and procedures. These are delivered through various workshops, seminars, and specialized events at the Laser and Health Academy's training and demonstration facility or on-site at the Laser and Health Academy Lecturers' surgeries and clinics.

Visit www.laserandhealth.com for more information about the Academy's activities and the use of lasers in medicine and dentistry.

Preliminary Schedule & Curriculum

Day 1	
Lecturers: see below	
Location: LA&HA Institute, Ljubljana, Slovenia	
08:30 – 08:45	General workshop information and introduction with morning coffee <i>Neja Gerdovič, Fotona</i>
08.45 – 09.30	Lasers Physics and Laser Safety <i>Tomaž Suhovršnik or Amra Bajrić, Fotona</i>
09.30 – 10.15	Laser-Tissue Interaction <i>Jasmina Vesel, MSc, Fotona</i>
10.15 – 10.45	Short Break
10.45 – 13.00	StarWalker® PICO Pro in Aesthetics and Dermatology <i>Jan Bogataj or Ivana Bogataj Tancer, MD, Fotona</i>

Places to stay

Ljubljana has many accommodations to suit everybody's tastes, needs, and budgets. The following hotels are particularly popular with our workshop participants and are recommended by us. You can find a broader selection of accommodations on www.visitljubljana.si.

Pleasant and modern hotel just minutes' walk from the city center.

The Eurostars Hotel Company in Ljubljana features three hotels with different concepts, all on a top location in the city center of Ljubljana, Slovenia.

Since 1964 **Fotona** has been a pioneering laser technology company. Our laser systems result from over 60 years of experience, know-how, and expertise in medicine, communications, and industry. When you choose Fotona, you choose the world's highest-performance, best-made laser systems.

Ljubljana is considered a city that suits everyone, from its inhabitants to its numerous visitors. It maintains a small town's friendliness and possesses all the characteristics of a more significant metropolis.

Due to its geographical position, Ljubljana also represents an ideal starting point to discover Slovenia's amazingly diverse features and beauty.

www.ljubljana-tourism.si

Slovenia lies at the heart of Europe, where the Alps and the Mediterranean meet the Pannonian plains and the mysterious Karst. Slovenia is a great tourist destination as a small, beautiful, and picturesque country.
